Comments

I found this class really interesting. Brother Jensen does a great job teaching the material simply and answering questions. I also really appreciated how the exams were so similar to the study guide.

Brother Jensen is a great teacher, but maybe should learn when to cut off accepting questions especially from such a large class because it seemed like it would take up to much time. In my personal opinion, He uses to many power-points, and those can get very boring and easy to not pay attention.

Brother Jensen always made learning fun! I loved this class.

I really enjoyed the class. I thought it was fun and good to learn about

I've taken this course twice with the same note taking techniques, same time, same me but different I structor and it was so so so much better with brother Jensen. I felt as though he cared a lot ,ore about his students and about whether they were learning or not. And it's a 7:45 class and he understood if people were super tired and what not. He's an exceptional professor

I enjoyed going to class and learning about the mind. I think my biggest problem was that I picked such an early time so I struggled to motivate myself to go as often as I should have

I absolutely loved this class and would take it by brother Jensen a million times over because I loved his teaching style and humor!

I loved how well Brother Jensen prepared us for the tests. You could tell that he really wants his students to exceed. He was also so easy to contact. He would get right back to you.

I really liked Brother Jensen, he is kind and willing to help us understand, he solves questions and his classes are fun!

This was a rough class because I took it at 7:45 but for a first time professor, brother Jensen was really good at engaging us. He also organized the course in a way that encouraged enthusiastic learning.

I actually looked forward to the exams

Awesome professor, super workable, and I really liked his teaching methods.

He's good about prepping us for tests, easy to talk to

I enjoyed the course, the instructor and the knowledge I obtained in this course.

Very apparent that Brother Jensen is a new teacher. He reads off of his slides and posts them online, so it almost makes you question why you go to class in the first place. If you can memorize everything you'll ace the class, but if you focus on application, you'll struggle in this class.

An amazing professor!

Brother Jensen is very knowledgeable about what psychology is, and I feel that if he were to incorporate more of himself into the lessons and be himself then it would be much more exciting and make the course material more enjoyable.

I'm super glad I was able to take your class. I appreciate how you taught simply, yet I feel like I learned a lot about psychology! Great job this semester!

This class was fascinating to learn. I feel like I would have enjoyed this class more if it was not so early in the morning. The teacher is good and you can tell he enjoys teaching psychology. The more you are in that class, the better you will understand the concept/ material given to you.

It was great.

Brother Jensen is a young teacher, but he does a great job.

The teacher was very knowledgeable. He also was very good about answer any all question. He is very inclusive and kind

It was frustrating to read the chapter before class (because we had to take a quiz before class) and then during class Brother Jensen simply reiterated everything we had just read. It would be more beneficial to expound upon the topics we had read about.

Brother Jensen didn't require attendance, so people never came. His lectures were also very dry. But the amount of busy work was perfect!

Your jokes and sense of humor were greatly appreciated. That made the tests a lot less stressful, and it made the tests a little enjoyable.

If I had to suggest something, I would suggest making the classes a little more interactive. I get that our class is in the early morning, but that would be one little thing I would suggest.

I love this professor! He is clear in his criteria and doesn't give busy work. The lectures are very interesting and well prepared. Best lecture class. this course. and this professor were great! i learned a whole ton.

Comments

I really enjoyed all the content shared in class, I do feel like lecture was repetitive due to our tests being based on learning definitions. Perhaps if there were some class periods where class was more interactive or diverse in someway.

Great Teacher might be young an inexperienced but overall a great teacher

Brother Jensen was a really nice teacher. He explained everything in a way that was easy to understand and made his class interactive and fun. 10/10 would definitely recommend!

I loved this class and the content. Brother Jensen is a great teacher.

This was a great class. Awesome teacher, and it was not super difficult if you do the work.

Brother Jensen is a very considerate, caring individual. He also takes great strides to teach his students inside the classrooms. I am very grateful I had the opportunity to be in his class. I highly recommend this class to anyone taking foundations.

Very understanding and will listen and hear out anyone. He would never make you feel stupid for asking a question and is humble enough to say he doesn't know the answer to some of the questions at the moment when asked odd questions. Very funny too.

None

I didn't feel like I learned anything new, I could learn everything from the slides. He said he was more related to the students, but this has been the hardest class I've had, it was really hard to get into. There wasn't very much interaction with others. And I just really struggles with this class, and that normally never happens.

Jensen is the best teacher ever!

I loved this class.

I liked the "nerdy" questions on the exams. when doing an exam it can be stressful but then to come across some random thing about lord of the rings it makes me laugh a bit and makes the exams less stressful.

He was reading the powerpoints the whole time, he did not gave so many examples or make the class being more interactive. It was more of the time he talking alone

Great teacher! Really enjoyed learning from him.

Overall, a great class

Good teacher and the course was okay, I found it difficult to motivate myself to pay attention though when I knew that the class was purely a review of a powerpoint posted online.

Loved every single class I had.

Im not entirely sure if this class counts as a foundations class or an elective.

I love Kyle!!!!!!!!!!!!

Thanks for being a good and flexible teacher!

I very much enjoyed this class and learned a lot. Bro. Jensen is a good teacher and helps me to understand the material.

there was little incentive to go to class because the quizzes had to be taken before class. Basically I had to learn everything before I went to class and then I was just repeated everything I already knew. It would be better if you took the quiz after class so you can reflect what you have learned and what you have been taught.

Felt like attendance to the class wasn't really mandatory to get a good grade, so the motivation to go was low.

Brother Jensen was awesome. He went to lengths to gives us good ways to remember the material and made things fun. He easily related new knowledge to things that we already know and can relate to, like tv shows and movies. It helped the material stick and helped me do better on the tests.

Brother Jensen is an amazing teacher and he makes learning so much fun. I love his class and his teaching style, he is so caring of his students and really wants them to succeed.

The lectures are boring. Try to make them more exciting. The material is great, but the sitting in class just drags on.

Bro. Jensen does an amazing job of explaining concepts in a way that is easy for everyone to understand and does an amazing job at making the course fun and interesting.

I found this course interesting and fun to learn about.

I am very grateful for brother Jensen and his passion for psychology and teaching, it got me excited!

Comments

I was scared to take this class from him because he was young and new to teaching. However, he did an AMAZING job. I loved coming to class, and he explained everything perfectly. His PP slides were great too.

Great learning and enjoyable environment with Brother Jensen

Bro Jensen is a great instructor. He speaks clearly and is easily understood. He is also very clear about his grading criteria and expectations for the class. I really appreciate his sense of humor! He would give us exam questions that involved popular movie references that were pertinent to the material. Please continue to do this!! It lifted spirits during exams, it tested us on the appropriate material, but in a fun way! Thanks for a great semester Bro. Jensen!

I have really enjoyed taking this class. Psychology is a very fascinating subject to me and I have enjoyed learning all sorts of things about the human psyche. If you put in a good amount of effort, you will pass the class easy. I love how the exams are not terribly difficult and it gives me a greater reason to learn the material to actually learn it rather than to use it for a difficult exam and then dump it from my mind.

I absolutely loved this class, however, Brother Jensen was very monotone when lecturing which made it hard to pay attention. Overall, I loved this course, though!

I personally found it hard to keep up with the homework reading that were due every class period. However, I liked having exams more often with less material to cover.

I think brother Jensen is a great teacher and it really helped that he only requires us to know the information for the tests and does not try to trick us, great class.

Brother Jensen is a really great professor who adds the right amount of humor into every lecture. I thoroughly enjoyed his class, and learned a great deal about the basics of psychology.

Brother Jensen is a good and clear teacher. I often have questions and he answers them very clearly. He knows how to teach very well.

Very great course. well organized and structured for success.

I have been considering a change in major, and taking this class has really helped with that decision. Looking more seriously into becoming a psychology major.

I enjoyed this class, it was just hard to pay attention for the whole hour because the class was lecture based. That is the only aspect of the class that I would change. Other than that I really enjoyed this course.

When going over the power point in class, sometimes he repeats what he says. This happens on multiple slides which makes it difficult to finish the assigned instruction for the day.

This course was so much fun to take! I definitely recommend it for anyone who wants to take it.

Brother Jensen is an awesome teacher. I looked forward to each class hour and he definitely made sure we had all the information we needed to succeed in this course.

I loved how organized Brother Jensen was and how he taught with clarity. His jokes were awesome! The assignments were not easy but not impossible. I would take another class from him again.

I really enjoyed Brother Jensen as he is a little younger and has more life in him and I feel like the class as a whole really gets along with him. He is a great professor and I have really enjoyed taking this class. The beginning of the semester was a little rough starting out but I soon adjusted to the pace of the class.

it would of been great if you made the class more interactive and actually took role.

Enjoyed Brother Jensen. He is very willing to do whatever he needs to in order to help his student have a good understanding of the material.

I loved this course so much not only the class but also brother Jensen. I would like to take his class again if he teaches other classes in the future.

Great lectures and great teacher

I really loved being a part of Brother Jensens class. In a class that would be easy to teach from an opinionated point of view, he did a great job of just teaching the core principles. I loved the examples he would give to better paint the picture of each principle. Overall, he made learning a good experience and not a chore. I loved this class.

Great class. The teacher is fantastic and would highly recommend.

Sometimes the class could be a tad boring until Brother Jensen started to tell us stories that relate to the curriculum. It helped me connect the lessons better.

Brother Jensen was a great teacher and understood students needs and helped us learn effectively.

I loved this class. It was very interesting. Brother Jensen is great!

The professor created the power point and put it on I-learn and in class basically just read them. I felt I had no reason to go to class

Kyle Jensen was by far my favorite teacher. He was a little monotone, but because I could tell that he loved his subject, I didn't mind. Other people did. I felt that he was engaging from the start of the class to the end of the class. I couldn't keep my interest from dying from what he had to say no matter how stressed or tired I was. I liked how he always put his best effort into our lessons. He stayed true to the subject matter and never deviated from what we had to know unless it was to help us understand a particular subject, or help us gain a stronger relationship with the subject matter. He helped me see psychology the way that helped me begin to love it.

Brother Jensen is a great guy, but he needs to change his teaching technique. I can tell he has a lot of passion for the class, but I feel he could use it more effectively in another teaching style. Lecture classes are tough! But he could have done a better job with placing importance on class and being there, as opposed to studying on your own.

I would suggest that you move your lectures along more. I tended to fall asleep rather easily in your classes. I would suggest more relevant connections?

I wish that class hadn't been exactly the same as the chapter I read. It was difficult to want to go to class when I knew I had already read the same things that would be said.

I loved the class overall, it was so much fun and I have learned so much. I was able to take what I learned and and apply it to myself and my other classes. I am very happy with my instructor. He was amazing!

Brother Jensen is very new at teaching.

I love Brother Jensen! He kept his slides and exam questions really creative. I loved coming to class. There was always something new and interesting. Brother Jensen is such a funny professor and he knows so much. He really cares about his students. I recommend taking this course from Brother Jensen to all students!

I love the way Brother Jensen has his assignments structured. The homework quizzes are open book so I always get 100%. This may seem too easy but I actually have learned a lot more because I know the right answers for sure instead of having to guess and hope that I know the material. This is the only class in which I've gotten a 98% on an exam. I believe this is because of the way the homework quizzes and class are structured.

The class had interesting ideas but everything was ready straight from the PowerPoint. I had a hard time wanting to go because I could read the PowerPoint by myself later and get the information in a fraction of the time. I did like the teacher enough though.

Brother Jensen is an exceptional teacher who is easy to work with.

This course has given me a love for psychology. The information that I have learned has been very interesting and I have enjoyed reading the textbook and going to class. I am excited to take more psychology courses in the future. Brother Jensen did a great job at preparing us for exams and reviewing what we had read in the chapter.

Loved taking this course from Brother Jensen and learned a lot.

Brother Jensen is good. yes sometimes he speaks with monotone. but his criteria is clear. His study guides cover everything on the test. and he doesn't give a lot of busy work. Would Recommend

Brother Jensen has a great sense of humor, and ability to connect with his students. I would definitely take another class from him.

He was a very good instructor. It also prepared us very well for upcoming assignments with reminders and "how to do's". I appreciated the test prep classes

Considering he hasn't finished all of his school for a PhD like other professors, his course was amazing. It was easy to understand and very straight forward.

My favorite part about the class was how simple it was set up. I loved that there were consistent assignments due and nothing was confusing. I loved this set up.

Brother Jensen is a very knowledgeable teacher but is not afraid to say he doesn't know a topic if it is out of his knowledge. Jensen definitely has the goal of making sure his students succeed.

Psychology 111 has been a very interesting and beneficial class to my education even though it is not my major. I think Kyle Jensen does a good job teaching alongside the lecture slides, but I think the class could always involve the students a bit more. I think it would help if there were more projects or activities to add an occasional break to the constant sit-down and listen kind of educational experience.

The tests are based upon the lectures but because there is so much material to cover there is no flavor to the class. Simply put I could pass the class without attending and there was no penalty for not attending so I didn't and I passed with an A. I don't think there is a way to fix this because there is so much material to cover. I feel bad for the professor he does a great job of inserting his voice where he can, limited as those opportunities are.

For as young of a teacher Kyle Jensen is, he does a great job at handling discussion and teaching moments.

Brother Jensen is an excellent teacher and I would recommend his class to anyone. The curriculum was easily understood and provided me with new knowledge and insights.

The course was good, but the teacher made the class worth going to. He was on the ball, started on time, reviewed the material and didn't waste time. My only criticism would be Brother Jensen doesn't look at the class as often as he should, there were a lot of students with their hands held up asking questions, but they wouldn't get called because he doesn't look up from his PowerPoint very often.

Other than that, wonderful, amazing teacher! I would highly recommend him!

Brother Jensen is an exceptional teacher that really makes this course interesting and fun.

For how much material there is, I appreciated Brother Jensen simplifying the material into the most substantial points to remember. It really helped me retain the key points and ideas.

I loved the material, but I wish we would have learned it in a different, more entertaining, more effective way. I did not enjoy learning from power points every day. The classes were very boring. The teacher didn't help that much either. His way of teaching was also very boring.

Course could be better. Teacher is new but knowledgeable. Be Confident.

I like Brother Jensen! I love that he incorporates nerdy things like LOTR, Harry Potter, Pokemon and many more into psychology. It helps me understand what I'm being taught and it makes it fun for me! I enjoyed this class a lot!

Brother Jensen is a great teacher. He is very good at teaching and explaining subjects so that it sinks in.

I felt like I would prepare for class by doing the homework and then go to class and learn the same exact information without any additional insights. That is the main reason I stopped going to class, I just wish the class was more than going through a powerpoint of the same information and had a little more enthusiasm and excitement for the subject.

I love how Brother Jensen gives us examples throughout class, so we better understand the material. One thing that could be improved is questions in class being answered. When students ask questions in class and Brother Jensen does not know the answer to them, he usually just says "that is a good question, but I am not sure" and then moves on. I think it would be amazing if he would try to find the answer to the questions students ask and then report back during the next class period.

Wow! Powerful insight!

Brother Jensen is a fantastic teacher. He really knows his material and has good examples for the students. If I had one recommendation it would be to be more assertive when asking for the opening prayer.

Great teacher! Very straight forward, never tried to be tricky on tests.

Kyle Jensen was very much monotone which can make topics dry and hard to be intrested in.

He's great. 10/10

I would recommend teaching more than just in lectures. Also, look at the audience more because a lot of us raise our hands but you don't see and it's weird to speak out and interrupt you to ask a question, so a lot of them seem to go unanswered.

I am glad that I took this class from Brother Jensen! I highly enjoy his teaching style. For example, I really like that we were given a calendar for the entire semester so that we would know what was going to happen in every class. I also really appreciated the test reviews he would give us before we would take a test.

Brother Jensen is a great professor. Would highly recommend.

May be if there was less lecture from the power points and maybe more situations in which we could apply the things which we learn

Brother Jensen's class structure is really good. He works very well with students and is willing to answer questions. It was a great class, and I have recommended other students to take Psych 111 from him.

Be more energetic and show more passion toward what you are teaching. Don't just read off your slide shows every class. Mix it up.

I took this class twice and I can see that the instructor is improving really fast. He is passionate about teaching, although he might come off as boring sometimes. He strives to do his best, and he has the best interest of the students in his heart.

Brother Jensen is amazing! The way he teaches the material makes it relatable which in turn makes test taking so much less stressful than it has been for other classes.

He is a great teacher and is very educated in this subject. The only thing that I think would be more beneficial is more class participation so that the students do not lose focus.

Brother Jensen, although younger and less experienced than most professors, showed the utmost maturity and professionalism. I am grateful to have been in a class where I could tell my teacher took time to know the material and would do whatever he needed to to help us succeed.

Brother Jensen is knowledgeable professor, but I feel that his teaching method did not keep me engaged in the class. Specifically, I often did not feel the need to go to class as he would often read off of the slides word for word

Bro. Jensen is a great guy but he needs more experience.

There were some days where the Instructor was literally reading off of the powerpoint for the lecture. It would get very boring and uninvolved sometimes. Like bone-dry.

It would be nice if we didn't just go through class taking notes all day long and listening to you talk. I would really like it if we could do some other type of learning a couple times a week. It wasn't bad but one thing that I really didn't like was the fact that you went over the notes and everything super dragged out and talked about things that weren't even on the test, then when we got to the test reviews you sped through them not giving us enough time to even get anything down. Thanks though it was alright.

I felt the course would have been better, had it been more interactive. It kinda felt like they were just trying to cram in as much information as they could. Like there wasn't enough time to really appreciate what we were learning.

Brother Jensen was a great teacher and I very much enjoyed taking this class from him

I really liked how Bro. Jensen made the exams fun with his star wars/marvel examples. It made it much easier to recognize what answer belonged in the situation and made it fun!

Brother Jensen was really helpful throughout the whole course. Communication and response to emails was exceptional, he works with and helps you to do the best you can on exams.

Great style of teaching and the test reviews were very helpful!

Brother Jensen was a good teacher. The only thing that I was struggling with was trying to catch up with him. He kept going through the slides pretty quick to where I couldn't get the important information down. He also saves his test reviews to the last 5-10 minutes so you can't write anything down because he just skims through them and briefly explains each slide. His class would have been better if he would've slowed down a little bit.

Brother Jensen was very knowledgeable in psychology, making the subject easier to learn for all of his students.

Brother Jensen's test questions are often related back to popular media like "Star Wars" or other well-known movies and shows. It makes the test questions more relatable and easier to remember the information for the future. His teaching style in class isn't particularly strong but is serviceable, it may just be due to his lack of experience as a teacher. Brother Jensen does a good job making sure that deadlines and assignments are known to the class. I overall had a positive experience.

This was a very good course and I feel that I learned a lot from it.

Brother Jensen is an amazing guy and he is very knowledgeable about psychology, but the classes are mainly just lecture so it's hard to focus and stay motivated sometimes because we do the exact same thing every class period. He does really well relating subjects to us so they're easier to remember though.

Notes. Scores are computed from selected items in the Course Evaluation instrument that correspond to the Learning Model element. Specifically, they are the sum of the averages of selected items as follows:

Outcomes: Course Item #1, Course Item #3, Course Item #5

Architecture: Course Item #2, Course Item #4, Course Item #6, Instructor Item #2 (Course Item #2 is not included for online classes)

Prepare: Student Item #1, Student Item #2, Student Item #5, Instructor Item #9 (Student Item #2 and Instructor Item #9 are not included for online classes)

Teach One Another: Student Item #3, Student Item #4, Student Item #7, Course Item #7, Course Item #8, Course Item #9, Instructor Item #10

Ponder/Prove: Student Item #6, Student Item #8, Instructor Item #11

Course Evaluation Written Comments - Winter 2018

Instructor: Jensen, Kyle

Course: PSYCH111

Title: General Psychology

What could be done to improve this course to help you learn more?

Require more assignments and theory based questions. One of the tests had a lot of that but the rest was a lot of memorization. Maybe a bit more application but I still thought it was a good class for what I wanted out of it.

If Brother Jensen got more excited about things, tried to make things more interactive rather than just lecture.

He doesn't have a knowledge that extends much outside of the course. A lot of the questions in class asked by the students went unanswered because of inexperience.

Brother Jensen just needs to be more confident in himself. He is a very good teacher, but if he was more confident in his abilities, then some things may have had a more lasting impact on me.

I think Brother Jensen could be more confident in himself and what he is teaching.

i strongly feel that Brother Jensen could have acquired more knowledge before he taught. he simply just read everything off of his slides and didn't teach. when asked questions, he had little to no knowledge on how to answer them

N/A

I feel like I've learned a whole lot.

I think Brother Jensen does a great job of teaching the material, but I felt there was more room for gospel application that would deepen and greatly strengthen testimonies.

I think that he could amp up the enthusiasm a little bit. There were some definite sections where he was really excited to teach, and I felt like it was those ones where I learned the most because I was able to see it in a different light than simple study material, but overall I think that Brother Jensen is a wonderful teacher.

The teacher should do more than read off slides to keep us engaged in the subject.

Honestly, I didn't have to attend lectures to do well in this class, nor did I feel like class benefited me. After attending class for the first half of the semester, I realized that I only needed to read the chapter in the book, take down the notes from the lecture slides on I-Learn, and then come to the test review. So that's what I did and I still received an A+. To improve, I would suggest asking more insightful questions in class to engage the student and show more enthusiasm toward the subject of Psychology. Put something in class time that none of us can get from just reading the chapter. I understand Brother Jensen is fairly new, so a lot of these improvements will come with time. :)

There were a lot of questions he couldn't answer because he wasn't a licensed psychologist.

Course: PSYCH111

Title:

General Psychology

What could be done to improve this course to help you learn more?

I would have a test on each chapter individually.

One hard thing is that he can be kind of monotone sometimes.

Some of the quizzes were confusing to find the correct answer in the book.

Bro. Jensen is a great teacher. He just needs to have confidence in front of his students.

Lectures could be less boring

na

Make the quizzes more applicable.

not sure

I think bro jensen did good and the class went good.

There is a lot of information that needs to be learned. So one thing we can do is be more specific what we need to study for the test and make it more known for is most important. I think he could tell more stories. He talks about how we learn through pictures and by pictures. Stories about all the diseases and symptoms would be cool to hear and learn by.

nothing!

I though brother Jenson did a good job at covering all the material and prepared us for the tests well. I have no complaints except he could've tied things to the gospel like my other teachers.

The teacher could make learning about it all more exciting rather than just reading off a PowerPoint the whole class.

If the instructor would talk a bit more expressively it would make it easier to concentrate during lectures.

No.

I'm not the biggest fan of the prep-quiz's. I just think they can easily be manipulated and don't show thought. This is not a class that goes into the most depth but I would have been fine with writing more reflective essays. Or maybe just a section at the end of the prep-quiz that poses a thoughtful question.

I think more assignment or projects with the material. In class there was a lot of lecturing and before class there was a lot of reading and studying. I think if there were more hands on activities or

Course Evaluation Written Comments - Winter 2018

Course: PSYCH111

Title:

General Psychology

What could be done to improve this course to help you learn more?

assignments other than the quizzes it would have helped me gain a deeper understanding of the subject. For instance, the Stress and Health project helped me get into the material a lot more.

Quizzes should be after the class

I always felt like the class period wasn't long enough, we always ran out of time and always felt rushed at the end.

More research and examples

Nothing, it's a class meant for freshmen so it shouldn't be very challenging.

The only thing i can think of would be to post the test review on I-learn

Nothing.

jut making the test review powerpoints available after the review session for additional review

Keep focusing on the exam material, while also helping those who need the class for a Major to understand the material on a level more suited for their major.

Sometimes it was hard to hear him.

The only thing about this course that I did not enjoy was that the Instructor had a very monotone and quiet voice so it was very challenging at times to stay focused and alert throughout the class block. Everything else was great!

I think that going over the chapters before the quizzes are due is more wise and better in order for students to learn and retain information.

less quiz and test based.

More ability to apply what we are learning. i know this is difficult for a large lecture style class, but it would help to be able to work through the work we are doing in class.

I wished his notes and study guides were more detailed. It was hard for me to understand what exactly he wanted us to study.

More direct examples in class. Simple and more concise explanations of material.

n/a

Section 7. Learning Model Scores

Element	Your Score	Percent of Maximum	BYU-Idaho Average
Outcomes	18.5 (of 21)	88.3%	82.7%
Architecture	24.3 (of 28)	86.6%	83.5%
Prepare	21.7 (of 28)	77.6%	84.9%
Teach One Another	35.8 (of 49)	73.1%	82.0%
Ponder/Prove	16.9 (of 21)	80.3%	84.0%

Notes. Scores are computed from selected items in the Course Evaluation instrument that correspond to the Learning Model element. Specifically, they are the sum of the averages of selected items as follows:

Outcomes: Course Item #1, Course Item #3, Course Item #5

Architecture: Course Item #2, Course Item #4, Course Item #6, Instructor Item #2 (Course Item #2 is not included for online classes)

Prepare: Student Item #1, Student Item #2, Student Item #5, Instructor Item #9 (Student Item #2 and Instructor Item #9 are not included for online classes)

Teach One Another: Student Item #3, Student Item #4, Student Item #7, Course Item #7, Course Item #8, Course Item #9, Instructor Item #10

Ponder/Prove: Student Item #6, Student Item #8, Instructor Item #11

Course Evaluation Written Comments - Winter 2018

Instructor: Jensen, Kyle

Course: PSYCH111

Title: General Psychology

What could be done to improve this course to help you learn more?

Maybe make things a little more interactive

Explain things and not just read off slides

There were times where I felt that he had allowed too many questions causing us to get behind on the course material. Although it was still really good that we had those questions asked because it gave some clarification on the topics being discussed.

More interaction among students during class would be better.

More application, less lecture.

I think that doing some in class work or quizzes would be effective to promote a higher learning and comprehension.

More interactive opportunities. learning through discussion or interacting rather than lecture every day.

Do more teaching instead of only reading PowerPoint slides.

If there were practice tests provided on i-Learn that would help me prepare for the exams, I feel that would be really beneficial. Thank you!

It was so hard for me to find motivation to come to class more. A lot of the times he was reading off of the slides that I could easily find in I-learn.

Maybe not be based solely off the textbook.

I would say make the tests harder. Challenge helps people grow, so that's about all I can think of to change.

He does speak in a monotone voice, it makes it a little harder to pay attention, especially early in the morning, but as time goes by I'm sure he will sound less monotone. But over all, great teacher.

I can't think of any thing.

It would be helpful to have a variety of ways to interact in class...I find it hard to stay awake for the 7:45 class so some sort of interaction would be helpful.

Sometimes there was too much content and not enough group discussion.

Course Evaluation Written Comments - Winter 2018

Title: General Psychology

What could be done to improve this course to help you learn more?

I think more class activities like the chicken lab would really be interesting and helpful.

He's a new professor so I understand is quietness, but maybe if he spoke up and was more excited about what he's teaching.

Make classes interactive, don't read off powerpoints that are available to the students. We know how to read. Make test matter more applicable to the class.

The only thing I would change is...well honestly nothing. I like the way the class was set up, how it was taught. Like, I mentioned before, the lectures were sometimes boring but for the most part, they were really entertaining. Loved how the teacher used everyday photos/movies/quotes from things that my generation knows.

I don't know how to improve this course, maybe making the exams more challenging.

I honestly don't know, when it comes to providing feedback, I am very poor at this.

Maybe just a little more knowledge about the material. He will surely gain that with time though! Great instructor!!!

maybe add in a few more interactive opportunities during class lectures.

Some lessons he didn't ask as many questions, but those ones had a lot of material to cover so I don't know how exactly you could improve it.

If the teacher used a different type of teaching method.

I believe that making the lessons a bit more interesting... Its definitely difficult since there is so much to cover. Probably the most effective is reading the slides and stuff, but I'm sure that there is something more one can do. We can all improve. Thank you for your time and help!! -Hector Aguirre

Be more enthusiastic.

I wish I would have enjoyed this class more. At the beginning of the semester, I was excited and motivated. I enjoy this subject but I really did not enjoy this class. There was so much interesting subject matter but the way it was presented was not my favorite.

none

I don't have any suggestions.

Class was really hard to stay alert in because there was very limited enthusiasm and interaction. Brother Jensen often would dismiss students' comments with a simple "good," when building off of them

Course: PSYCH111

Title: General Psychology

What could be done to improve this course to help you learn more?

probably would have helped the class to feel more involved instead of just reading the power point.

Not have it at 7:45

None

The only thing I would suggest is to bring a little more life and excitement into class.

Try to capture the audience attention, throw in jokes here and there.

I think maybe some more group work would be beneficial!

More connections to Gospel

N/A

Have a few more openings for class discussion.

Nothing

Maybe have the quizzes due after class.

I don't really know.

Course Evaluation Written Comments - Fall 2017

Instructor: Jensen, Kyle

Course: PSYCH111

Title: General Psychology

What could be done to improve this course to help you learn more?

More interactive learning. Not so much reading from a PowerPoint

The exams were pretty difficult. I feel like there could have been more done in class to better help us prepare for them.

Make power point test review for all the tests, I feel those are what prepare me the most.

Didn't always know the answers all of the questions that students asked.

Nothing that I can think of right now, I love this class!

There could be a few more hands on activities. The chicken lab helped me understand the learning material better, and I wish there were a few more activities to help with other lessons.

Our class time was not utilized very well. Often the instructor would spend too much time allowing certain students to offer their opinion of the subject matter, wether right or wrong, and the instructor would just allow them to talk as long as they wantwd.

He was just extremely nervous about teaching at the beginning, but as time went on he got more relaxed, which I think helped improve the classroom setting. Meaning next time he teaches he will be even better. I figure that now he can focus a little more on adding one or two things to the lesson that are not a part of the reading, to make it more interesting. This would also make it necessary to attend class, since many did not because it was solely based off of what was in the book. Another thing he could do to enforce attendance is give a few points for it like most other teachers I have taken do, usually by them taking a quiz at the beginning (doesnt necessarily have to be done every day). One thing I have learned from my other courses, is I learn the most when I have to read the book or material beforehand, and then when I come to class we talk about things that are related to it and go more in depth, but to the point where you have to of read the material beforehand for it to not make you lost. Learning this way also helps me greatly remember it more, rather than just writing it down to forget, it forces me to draw conclusions in my head and make connections between different parts, since in reality most of it is connected in some way or another and making those connections helps you put it in your memory where it can be used in an efficient manner, rather than many random separate facts and parts that will fade with time. If this latter suggestion of changing the course to the point where it is a second learning that adds to the book, I strongly just recommend bringing in many other parts that are not directly from the book and using some of the stuff brought in on the tests, since you shouldnt be able to pass the tests if you didnt go to class (and you can if everything is based off of the book).

nothing i learned a lot

At times it was hard to hear Brother Jensen. I sat in the 4th or 5th row the whole year and struggled hearing him. Also, I felt that he just read stuff to us and it wasn't very meaningful. The notes on the PowerPoint were too long and it was hard to get everything wrote down because he would read it and

Course Evaluation Written Comments - Fall 2017

Course: PSYCH111

Title: General Psychology

What could be done to improve this course to help you learn more?

move on. He was also very static. His voice and his movements were quiet and slow. He didn't move around at all and it made it a little boring.

The teacher seemed a little unknowing about some questioned that were raised in class but that is because it was his first semester teaching.

We should cover less material and go more in depth in other topics.

N/A

Had more participation/group work/activities. It would be nice to do something not in our seat.

Sometimes an hour and a half of just powerpoints didn't always help me learn everything I could have. Maybe there could have been more activities to do or something to switch things up and keep things interesting.

I need to be more involved and try harder.

Brother Jensen is a great guy, he struggled at times and lost his train of thought but he is also a first year teacher so I feel those things improve with time.

Not as much powerpoint and more information taught instead of told.

if we still miss questions by the 2nd attempt i think it would be beneficial if we would be given the correct answer.

nothing, its great!

If the lectures could be a bit more interactive it might help students be more involved and learn more. It was really just reading off the slides and writing down what he says if we wanted to.

More activities instead of only lectures.

This course was very good, I can't think of anything right now

I liked this class the way it was, I don't think I would change it

I think that the course would be even better if there were more assignments to help apply our knowledge of the material. This would help us to remember it more before exams.

I can't think of anything.

Course Evaluation Written Comments - Fall 2017

Instructor: Jensen, Kyle

Course: PSYCH111

Title: General Psychology

What could be done to improve this course to help you learn more?

I think by nature of him being an adjunct teacher. The knowledge and insights I was hoping to get out of the class wasn't what I expected. Classes were often times a repeat of what we've read in the textbook rather than an extension and a deepening to our understanding.

Sometimes the course felt a bit boring and monotonous because there wasn't much diversity at all in the learning activities.

More accountability to what is learned most of the assignments are open books or notes.

My instructor was not good at all. He just graduated with his Bachelors?? How could you hire someone who just graduated from BYU-I with his bachelor's degree in psychology? I know it was his first semester teaching, but I was not aware that college teachers could have anything less than a masters degree in whatever field they were hired to teach in. I did exceptionally poorly on the tests because for some reason he had to write them all himself. I should not hate an intro to psych class as much as I did this semester. I have talked to numerous people about this and everyone I talked to thought it was absurd that he could have been hired. Please never hire someone with his level of education again. I am extremely frustrated with this school right now because of this.

I think going to his class was kind of boring, it was like the textbook all over again. I think that he needs to be a little more interesting and not read exactly from the powerpoints.

I didn't like how every class was a PowerPoint that the instructor basically read. There wasn't a need to go to class, because everything was posted afterwards anyway, which is fine, but it made class very boring and tedious.

There were too many kids in that class that wanted to raise their hands and talk about stuff that was unrelated to course material. It was very annoying and distracting.

be held more accountable for reading the text book chapters.

Sometimes answers to the questions students asked were unclear or confusing. The instructor also tended to just read off a power point for the entirety of the class. Lots of him talking, reading off the screen. There could be something done to make it more engaging, or interactive.

More excitement and taking attendance. Also, an hour and a half is a long time for this class.

I think that the teacher was great. If anything took away from my learning experience, it was other students. Due to how large and all encompassing the course is, I found that students asked a lot of irrelevant and unnecessary questions. This detracted from my learning and often confused me a little bit. Otherwise, this course was exceptional and the teacher was as well.

Prepare better before class with expected to cover material. Most questions asked in class could not be answered, and he had to come back next class with the answers. He only knew what was on the slides and that was it.

Course: PSYCH111

Title: General Psychology

What could be done to improve this course to help you learn more?

More group work would be nice.

Have a more experienced professor

Each week we just read the chapter and then went through a powerpoint that contained exactly what the textbook had in it. We were able to just read the textbook and not have to come to class which made the class size shrink each week. I feel that the class could be more interesting and should contain more than just what is in the textbook so that students have incentive to come to class each week.

Make the lectures more exciting.

By making class attendance a requirement

maybe more real life examples to help illustrate a method or way of how psychologists in the past experimented.

Nothing, I loved it.

There was just a few times where he was too nice to the students who got off topic and shared too much information that wasn't related. I felt like I would've liked class a little better if there were more rules in place about how often you shared to make sure if students did share they would think twice if it was worth sharing.

I don't know, maybe the instructor could be a little more prepared. There was a lot of 'reading terms straight out of the book' stuff rather than teaching things in a very different way. And since we had just taken a quiz on the chapter we'd be discussing, it was all familiar and basically repetition. While repetition helps me memorize stuff, it was a little boring sometimes.

I thought everything was perfectly set up to help us learn the most we could learn.

He couldn't done more group discussion and less note taking.

More interactive work, like the chicken lab.
